*Intended for professional clients only***Investment objectives**

The fund aims generating exposure to the estimated upward trend of commodity markets, while reducing the risk of negative performance

Key points

- Continuous protection mechanism, with a protection level reset every month¹.
- Generate exposure to commodity markets and limit risk by creating a weighted portfolio of one long-only and two market-neutral indices
- The quantitative strategy embeds a volatility control mechanism that seeks to minimise its volatility below a target of 11%.

Investment strategy

- The continuous protection mechanism guarantees a minimum exit-value equal to 80% of the Fund's NAV, as recorded on the last business day of the previous month¹.
- The fund invests in 3 strategies:
 - o **Bloomberg Commodity TR Index (Beta Strategy) (50%)**: A broadly diversified commodity index with 20 underlyings
 - o **Curve Alpha (25%)**: Alpha generated by enhanced placement on the forward curve vs. the placement of benchmark indices
 - o **Backwardation Alpha (25%)**: Alpha generated by taking advantage of the usual outperformance of backwardated commodities
- The alpha strategies enter into Long and Short positions in order to benefit from both bullish and bearish trends in the commodity market.
- A risk-control mechanism is implemented minimizing its volatility to a target of 11%.

Comparison of the Target Alpha index to the BCOMTR Index (Simulations) ²

¹ The capital protection recorded on the relevant monthly observation date and reset on every monthly observation date is provided by BNP Paribas S.A. (S&P: A+ / Moody's: A2 / Fitch: A+)

² Source: BNP Paribas, Bloomberg. Performances prior to the 08 Jan.2014 have been simulated and may contain non-publicly available data as well as estimates of BNP Paribas. Simulations are for illustrative purposes only. The comparison is done in Euro. Past performance is not a reliable guide to future returns. Performance net of fees.

Please note that from 01 July 2014, Bloomberg manages the calculation and administration of the Dow Jones-UBS Commodity Index family, which has been rebranded as the "Bloomberg Commodity Index Family". Bloomberg will be responsible for the methodology, calculation, distribution, and licensing. The Bloomberg Commodity Index Total Return (BCOMTR Index) has therefore replaced the Dow Jones-UBS Commodity Index Total Return (DJUBSTR Index) on 01 July 2014. There was no change in the index calculation methodology or composition during this transition.

³ Source: BNP Paribas, Bloomberg. Past performance is not a reliable guide to future returns. Performance net of fees. The fund has been restructured on the 08 Jan. 2014

Starting from July 2nd, 2015, the fund name will be modified and will become "Protected Target Alpha Fund"

* The synthetic risk indicator is determined on a scale from 1 to 7 (7 being the highest risk level). It is subject to a periodical computation and can consequently change over time. We invite you to consult regularly the DICI.
