

Man Asia (ex Japan) Equity

Monthly summary report: 31 December 2024 Reporting Class: DW C EUR

Investment Policy

Investment Objective

Man Asia (ex Japan) Equity is a long only, style agnostic, fundamentally driven fund. The team’s core philosophy is to identify stocks with the best potential to deliver earnings surprises relative to expectations, which has historically been a persistent source of alpha in the region. The majority of risk relative to the benchmark and the majority of returns are expected to be achieved through idiosyncratic, stock specific risk taking. The portfolio will invest in Asia ex Japan companies across all market capitalisations, and will typically be concentrated across 35-45 stocks.

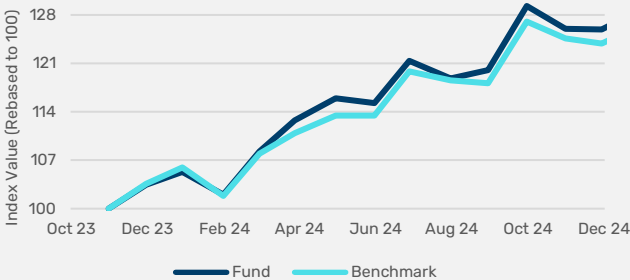

Type of Assets

The Fund will invest in at least two thirds of the net assets (after deduction of ancillary liquid assets) in equity securities (excluding securities convertible into equity securities) of issuers with a registered office in Asia ex Japan or of issuers which derive the majority of their revenues from activities in Asia ex Japan. The Fund will invest primarily in securities listed or traded on Recognised Markets in OECD member states or in securities of Benchmark constituents’ countries. Typically, the Portfolio will invest predominantly in transferable securities, including ordinary shares, preference shares, common stocks, depositary receipts (including ADRs and GDRs), rights, warrants and other similar equity like securities.

Monthly return¹: 2.29%

Performance Chart (Since Inception)¹

Past performance is not indicative of future performance. Returns may increase or decrease as a result of currency fluctuations.

Name	
Benchmark	MSCI AC Asia Ex Japan (EUR, NDTR)

Benchmark Degree of Freedom

The Fund is actively managed. The Fund does not intend to track the MSCI All Countries Asia ex Japan Total Return but may be constrained by it to an extent. The Benchmark will be used for risk management purposes which includes but is not to a monitoring of positions in the Fund relative to weights in the Benchmark. The Benchmark is also used for performance comparison purposes.

Please refer to the Fund’s Prospectus /Offering documents for additional details regarding the Investment policy.

Fund Risks

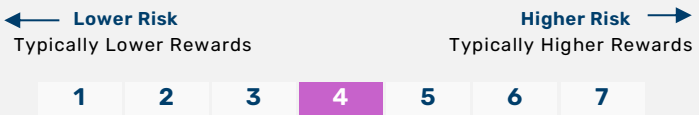

The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested. Prior to investing in the Fund investors should carefully consider the risks associated with investing, whether the Fund suits their investment requirements and whether they have sufficient resources to bear any losses which may result from an investment in the Fund. **Investors should only invest if they understand the terms on which the Fund is offered. Investors should consider the risks detailed in the risk glossary and where appropriate seek professional advice before investing.**

Dealing Terms

Valuation Frequency	Daily
Dealing Frequency	Daily
Subscription	Before 11:00 (Dublin) on dealing day
Redemption	Before 11:00 (Dublin) on dealing day
Management Company	Man Asset Management (Ireland) Limited

¹ Please note all performance statistics and charts are based on the lead reporting shareclass. Performance data is shown net of fees with income reinvested, and does not take into account sales and redemption charges where such costs are applicable. Returns are calculated net of management fees and any applicable performance fees. Other share classes may charge higher fees.

² Fund Size represents the combined AUM of all share-classes noted in the NAV table. The Fund promotes, among other characteristics, environmental or social characteristics within meaning of Article 8 of the Sustainable Finance Disclosure Regulation (SFDR) on sustainability-related disclosures in the financial services sector.

³ Sharpe ratio is calculated using a risk-free rate in the appropriate currency over the period analysed. Where an investment has underperformed the risk-free rate, the Sharpe ratio will be negative. Because the Sharpe ratio is an absolute measure of risk-adjusted return, negative Sharpe ratios are not shown as they can be misleading.

⁴ The organisations and/or financial instruments mentioned are for reference purposes only. The content of this material should not be construed as a recommendation for their purchase or sale.

⁵ ESG Score data is provided by MSCI. Please note the MSCI ESG score is rebased to 100% to ensure a fair comparison is able to be made. Weighted average carbon intensity represents the exposure to carbon-intensive companies, expressed in tons CO₂e / \$M revenue. Data provided by S&P Trucost, MSCI & Sustainalytics, calculated using the TCFD methodology (Scope 1&2 GHG Emissions in tonnes divided by Million \$ of revenue).

Sustainalytics' ESG Risk Ratings measure a company's exposure to industry-specific material ESG risks and how well a company is managing those risks. A company's ESG Risk Rating score is assigned to one of five risk categories: Negligible Risk (Overall Score of 0-9.99 points), Low Risk (10-19.99 points), Medium Risk (20-29.99 points), High Risk (30-39.99 points) & Severe Risk (40 and higher points). Index positions are not decomposed

It is important to note that there are limitations to the ESG data shown. By relying on externally sourced data, Man Group does not have full control over its quality. All three providers prioritise data related to corporate equity, whereas corporate credit coverage is generally lower. Certain markets, such as small and mid-cap issuers, continue to have incomplete disclosures or limited coverage. There is often a lag in the data available, driven by the timing of company reporting or the provider's collection, which presents a lack of continuity.

⁶ The share class in blue in the table is the reporting share class for the Fund and may be closed to new subscriptions.

⁷ Ongoing Charges Figure ("OCF"): A variable charge payable over a year, normally based on expenses to the Fund as of the previous accounting year. It excludes Performance Fees (if applicable) but includes the Management Fee.

⁸ Performance Fee (up to): The payment made to an Investment Manager if certain performance levels are achieved (often over and above any levels set out in the investment objective) within a set time period.

Risk Glossary

Prior to investing in the Fund investors should carefully consider the risks associated with investing, whether the Fund suits their investment requirements and whether they have sufficient resources to bear any losses which may result from an investment in the Fund. Investors should only invest if they understand the terms on which the Fund is offered. Investors should consider the following risks and where appropriate seek professional advice before investing:

Investment Objective Risk - There is no guarantee that the Fund will achieve its investment objective.

Market Risk - The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets.

Therefore, the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

Counterparty Risk - The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.

Currency Risk - The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.

Liquidity Risk - The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.

Concentration Risk - The Fund may invest in a limited number of investments which can increase the volatility of performance.

Financial Derivatives Instruments - The Fund may invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) typically for hedging purposes. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The use of FDI may multiply the gains or losses.

Emerging Markets - The Fund may invest a significant proportion of its assets in securities with exposure to emerging markets which involve additional risks relating to matters such as the illiquidity of securities and the potentially volatile nature of markets not typically associated with investing in other more established economies or markets.

Single Region/Country Risk - The Fund is a specialist country-specific or geographic regional fund, the investment carries greater risk than a more internationally diversified portfolio.

A complete description of risks is set out in the Fund's prospectus.

Glossary

Alpha - The excess returns relative to the market for a given amount of expected risk taken by the scheme.

Annualised Return - An annualised total return is an average amount of money earned by an investment each year over a given time period. It is calculated to show what an investor would earn over a period of time if the annual return was compounded.

Annualised Volatility - Volatility is the rate and extent at which the price of a portfolio, security or index, moves up and down. If the price swings up and down with large movements, it has high volatility. If the price moves more slowly and to a lesser extent, it has lower volatility. It is used as a measure of the riskiness of an investment. Annualised volatility is an average annual amount of volatility over a given time period.

Beta - A measure of how sensitive an investment portfolio is to market movements. The sign of the beta (+/-) indicates whether, on average, the portfolio's returns move in line with (+), or in the opposite direction (-), to the market. The market has a beta of 1. If the portfolio has a beta of less (more) than 1, it means that the security is theoretically less (more) volatile than the market.

Direct Trading Strategies - These strategies are the same as for fund investments, the categories of investment strategy are 'Equity Long-Short' (e.g. specialist equity strategies with a low directional bias), 'Risk Seeking' (e.g. credit, convertible bonds, emerging markets and long biased strategies) and 'Diversifying' (e.g. global macro, managed futures and overlay or hedging strategies).

Diversifying Strategies - These strategies comprise global macro, managed futures and overlay strategies that generally have low correlation to both traditional assets and other hedge fund strategies. As such, these strategies have the potential to improve overall Sharpe ratio and provide valuable downside protection.

Entry Charge - The entry charge shown is a maximum figure and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

Equity Long/Short Strategies - These strategies are the core capital allocation of the portfolio and are typically comprised of specialist equity strategies which have a low directional bias. These strategies aim to generate uncorrelated returns that provide the portfolio with consistent capital growth for a moderate level of risk.

Exposure - This refers to the part of a portfolio that is subject to the price movements of a specific security, sector, market or economic variable. It is typically expressed as a percentage of the total portfolio, e.g. the portfolio has 10% exposure to the mining sector.

Futures - Derivative financial contracts that obligate parties to buy or sell an asset at a predetermined future date and price.

Hedge/hedging - A method of reducing unnecessary or unintended risk.

Leverage - When referring to a company, leverage is the level of a company's debt in relation to its assets. A company with significantly more debt than capital is considered to be leveraged. It can also refer to a fund that borrows money or uses derivatives to magnify an investment position.

Long Position - A security that is bought in expectation that it will rise in value.

Market neutral - Type of investment strategy undertaken by an investor or an investment manager that seeks to profit from both increasing and decreasing prices in one or more markets while attempting to completely avoid some specific form of market risk.

NAV - The Net Asset Value (NAV) represents the value per share. It is calculated by dividing the total net asset value of the fund (the value of the fund's assets less its liabilities) by the number of shares outstanding.

Ongoing Charge Figure (OCF) - The OCF is estimated and based on expenses and may vary from year to year. It includes management fees but excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund. The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Options - Financial contracts that offer the right, but not the obligation, to buy or sell an asset at a given price on or before a given date in the future.

Performance Fee - The payment made to an Investment Manager if certain performance levels are achieved (often over and above any levels set out in the investment objective) within a set time period. Please refer to the fund's offering documents for a complete description.

Redemption Fee - This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.

Risk-seeking Strategies - These strategies include more opportunistic and directional based strategies such as emerging markets, credit and long-biased. These strategies provide the portfolio with additional return potential and the ability to capitalise on attractive sector/market opportunities.

Share Class - Type of fund shares held by investors in a fund (share classes differ by levels of charge and/or by other features such as hedging against currency risk). Each has a different level of charges and minimum investment.

Sharpe Ratio - The Sharpe Ratio is a measure for calculating risk-adjusted return, and has become the industry standard for such calculations. The Sharpe Ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk. The higher the ratio the better, with a number greater than 1 usually considered good, a number greater than 2 considered very good and a ratio of 3 or higher considered excellent. As it is an absolute measure of risk-adjusted return, negative Sharpe Ratios can be misleading and are therefore shown as N/A.

Short Position - Fund managers use this technique to borrow a security and then sell it with the intention of buying it back for less when the price falls. The position profits if the security falls in value. Within UCITS funds, derivatives - such as contracts for difference (CFDs) - can be used to simulate a short position.

UCITS - Stands for Undertakings for Collective Investments in Transferable Securities. This is the European regulatory framework for an investment vehicle that can be marketed across the European Union and is designed to enhance protections for Retail Investors.

YTD - Year-to-date.

Important information

This material is of a promotional nature.

The Fund is a sub-fund of Man Funds plc, domiciled in Ireland and registered with the Central Bank of Ireland. Full details of the Fund's objectives, investment policy and risks are located in the Prospectus which with the Key Investor Information Document (KIID) / Key Investor Document (KID), and the Report and Accounts of the UCITS, are accessible free of charge from the local information/paying agent, from authorised distributors and from www.man.com/documents. The KIID/KID is available in English and in an official language of the jurisdictions in which the Fund is registered for public sale. The Prospectus and the Reports and Accounts of the UCITS can be obtained in English. **In Switzerland**, the Prospectus is also available in German.

In Spain: Full prospectuses, KIDs, statutes and annual and semi-annual accounts of the investment products are available free of charge at the offices of the Spanish distributors authorised in Spain. A list of the Spanish distributors authorised and their contact details can be obtained on the Comisión Nacional del Mercado de Valores ("CNMV") website: www.cnmv.es. Man Funds plc: The sub-funds mentioned herein are authorised to be marketed to the public in Spain and belong to the Man Funds plc that is registered with the CNMV with registration number 296.

In order to fulfil the fund's objectives the Prospectus allows the manager the ability to invest principally in units of other collective investment schemes, bank deposits, derivatives contracts designed with the aim of gaining short term exposure to an underlying stock or index at a lower cost than owning the asset, or assets aiming to replicate a stock or debt securities index.

The Fund typically carries a risk of high volatility.

The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.

For a summary of investor rights please see www.man.com/investor-relations and for guidelines for individual or collective redress mechanisms, please consult the fund's prospectus and its key information document, as well as the complaints handling policy found here

www.man.com/complaints-handling-policy.
