## Fund Objective

The objective of the Fund is to provide a return in excess of Euro money market rates, preserve capital and maintain a reasonable level of liquidity.

## Investment Strategy

The Investment Manager, on behalf of the Fund, combines a relative value approach (i.e. where an asset's value is determined by taking into account the value of similar assets, looking for those that are "mispriced" relative to each other and aiming at exploiting such pricing discrepancies for the benefit of the Fund) to investing with credit quality analysis (as described in the "Credit Quality Assessment" section of the Prospectus) to identify securities that it believes will provide the greatest stability of capital and the highest probability of repayment, consistent with the Fund's investment objective.

Investments will be purchased with the intention that they will be held until maturity, although the Investment Manager may, in its sole discretion, not hold investments to maturity.

## IMMFA Member

SSGA is a member of the Institutional Money Market Funds Association (IMMFA), the trade association for AAA-rated European money market funds.

On the 18th February 2019 the NAV value was converted to €1000.0000 per unit. This allows the full negative income movement to be captured in the price, providing additional transparency and accuracy, as well as resulting in a smoother movement in the unit price. The conversion factor used was 1:100.71812.

The change in NAV value per unit does not change the value of the account as there is no difference in value under these two methods.

When the Fund is closed according to its official Net Asset Value (NAV) calendar but, nonetheless, a significant portion of the underlying security prices can be determined, a Technical NAV is calculated. Past Performance indicated herein has therefore been calculated using a Technical NAV when required, as well as the official NAV of the Fund as at each other business day for the relevant period.
