STRATEGY OVERVIEW

We aim to provide investors with long term capital appreciation through an actively managed portfolio of equities, listed or traded, or which conduct a predominant part of their economic activity in India.

The portfolio will typically consist of 25-40 companies in the Indian Subcontinent that we consider capable of benefiting from economic transformation of India. In our opinion, the best way to capture India's growth is to focus on companies that are leaders in under-penetrated categories (typically less than 10%).

KEY INVESTMENT RISKS

Liquidity Risk – The Fund may encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity.

Credit and Counterparty Risks – The Fund may be exposed to credit and counterparty risks in relation to the securities and counterparties it invests in and with whom it transacts.

Concentration Risk – This Fund holds a limited number of investments. If one of these falls in value, it can have a greater impact on the Fund's value than if the Fund held a larger number of investments.

Currency Risk – Investing in assets in a currency other than your own exposes the value of your investment to exchange rate fluctuations.

Derivatives – the Fund may use derivatives as investments or to manage the risk profile of the Fund. Their use may increase the risk of losses as well as enhance potential gains as compared to funds that do not use derivatives.

Emerging Market Risk – Investment in emerging markets may be considered speculative. Commonly legal and accounting regimes can offer less protection to investors than in developed markets.

Sustainability Risk – Environmental, social and governance events or conditions could occur that have an adverse impact on the value of the Fund's investments, either directly, or by contributing to the impact or materiality of other risks.

The Fund prospectus gives you further details about all the risks for this fund – see under “Important Information” for how to obtain a copy.
