

GF EUROPEAN STRATEGIC EQUITY

Retail Acc Class (A4) - Fund Factsheet - Covering the month of September 2024

James Inglis-Jones & Samantha Gleave

The Fund

The Irish-based Liontrust GF European Strategic Equity Fund is managed using the Cashflow Solution investment process to invest in a portfolio of long, synthetic long and synthetic short investments primarily in European equities and equity related derivatives. It is expected that a positive absolute return will be generated over three-year periods, but there is no guarantee that such a return will be generated over that specific time period or within another time period. For full investment objective and policy details please refer to the Prospectus.

Charges

Initial charge	Up to 5.00%
Ongoing Charges Figure*	1.71%
Included within the OCF is the Annual Management Charge**	1.50%

Performance fee 20%, with high watermark. Hurdle rate applies.

*The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees. The OCF **excludes** portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term. **These are the annual costs of running and managing the Fund. A performance fee of 20% is calculated and accrued at each valuation point. Payment is subject to the Fund's net asset value exceeding an Adjusted Prior Net Asset Value which is a High Water Mark adjusted by any new subscriptions or redemptions and a 4% hurdle per calendar year. No Performance Fee will be payable with respect to a Fund class in any Performance Period unless such class has recovered any accumulated underperformance for previous Performance Periods. Any performance fees are only payable on the positive difference between the NAV and the Adjusted Prior Net Asset Value. In the Fund's last financial year, the performance fee ranged from 1.32% to 4.41% depending on the share class.

Important information

Key Risks: We recommend this fund is held long term (minimum period of 5 years). We recommend that you hold this fund as part of a diversified portfolio of investments. Overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund. The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market. The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings. The Fund uses derivative instruments that may result in higher cash levels. Outside of normal conditions, the Fund may choose to hold higher levels of cash. Cash may be deposited with several credit counterparties (e.g. international banks) or in short dated bonds. A credit risk arises should one or more of these counterparties be unable to return the deposited cash. There is no guarantee that a positive absolute return will be generated over any time period. The issue of units/shares in Liontrust Funds may be subject to an initial charge, which will have an impact on the realisable value of the investment, particularly in the short term. Investments should always be considered as long term.
