What are the risks and what could I get in return?

Summary Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium low risk class. This classification takes into consideration two elements: 1) the market risk - that rates the potential losses from future performance at a medium low level; and 2) the credit risk which estimates that poor market conditions are very unlikely to impact our capacity to pay you. This product does not include any protection from future market performance so you could lose some or all of your investment.

Be aware of currency risk. If your currency is different from the currency in which the Fund is denominated, the final return you get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. The product does not include any protection from future market performance so you could lose some or all of your investment. Other risks may affect the Fund's performance. Please refer to the "Investment Risks" sections of the Prospectus and the Fund's Supplement which are available at www.keplerliquidstrategies.com/funds/kls-athos-event-driven-fund/

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Fund's assets are legally separated from the PRIIP Manufacturer's. The Fund's assets are held by the Depositary. You may face a financial loss in the event of a default, insolvency or compulsory wind-up of the Depositary. However, this risk is mitigated to a certain extent by the fact that the Depositary is required to segregate its own assets from the assets of the Fund. Losses are not covered by any investor compensation or guarantee scheme.

Recommended holding period: 5 years

The Fund has no required minimum holding period but has a recommended holding period of 5 years and is designed for medium-long term investment. You can redeem your investment at any time during the recommended holding period, or hold the investment longer. You may sell your shares or buy more shares in the Fund each business day as defined in the Funds Supplement.
