Ossiam Short Term Interest Rates Carry - 1A (EUR)

STRATEGY DESCRIPTION

The objective of the Sub-Fund is to capture the potential positive carry in short term interest rate futures. The Sub-Fund is actively managed without reference to any benchmark. Although the Sub-Fund aims to achieve its investment objective, there is no guarantee that this will be achieved. The Sub-Fund’s capital is at risk, meaning that the Sub-Fund could suffer a decrease in value and the value of an investment in the Sub-Fund would decrease as a result.

The Sub-Fund will target long and/or short exposure to 3-month interest rate futures (going long futures being equivalent to betting on a decrease in the underlying interest rate levels and vice versa). The futures will be denominated in major currencies (such as EUR and USD) and will be selected based on quantitative indicators determined by the Management Company. Those indicators may include among others for each contract:

- the “carry”, i.e. the difference between the price of the future and the previously expiring contract;
- the “trend”, i.e. its recent historical performance; and
- the “volatility”, i.e. the standard deviation of its past returns.
