## Cumulative performance

## Monthly Comment

European markets rallied in February helped by better-than-expected results across the board and increased expectations of an end to hostilities in Ukraine. Inflows into European equities helped sustain the outperformance of the asset class. However, an announcement of tariffs for European goods continues to be a possibility. ELEVA European Selection was up 1.80% vs an index up 3.41%, an underperformance of 161 bps.

Sector allocation had a slightly negative impact, due to the overweight in consumer discretionary and communication services and the underweight in consumer staples, but that was somewhat offset by the positive impact of technology, energy and real estate.

Stock picking was negative, particularly in financials, health care and technology. The lack of pure play defense names also hindered performance.

**Rolls Royce** had a very strong set of results and materially upgraded their free cash flow expectations in the short term and also in 2028. **Siemens** also positively surprised on their key Smart Infrastructure division, highlighting a potential turnaround in automation orders after a period of weakness. Banks (**Barclays**, **Commerzbank**, **Intesa San Paolo**) continued to rally with positive comments and upgrades in their capital return expectations. Unfortunately, we were too defensive in our financial allocation (with insufficient exposure) and stock picking was detrimental this month.

**BE Semiconductor Industries** disappointed on its outlook, with a lack of short-term recovery in its base business despite long term interest in their hybrid bonding solutions. **Capgemini** released disappointing guidance after two average years. **Publicis** delivered good results but was affected by profit warnings from peers. Some mega caps (**AstraZeneca**, **Nestle**) performed well but were not present enough in the portfolio this month.

Economic growth was decent in 2024, with low growth in Europe and in China balanced by an acceleration in the US. Falling inflation expectations reduce the risks of a Central Bank mistake. The macro environment was deteriorating last year, but we see now a modest inflection in Europe and a more material one in the Global and US indicator. Patience is needed in Europe for interest rates to have an impact on economic activity. In that environment, we believe that corporates will still be able to grow at a moderate pace. Value and cyclicals were at 47.7% and 52.1% of the fund respectively.

Since inception, ELEVA European Selection is up 139.42% vs an index up 94.41%, an outperformance of 4,501 bps.
