

Allianz Emerging Markets Short Duration Bond - IT - USD

Fund for emerging markets bonds with short duration

Investment Objective

The fund concentrates on USD denominated bonds of public and private issuers from emerging market countries or companies that generate the predominant share of their revenues in the emerging markets. The fund may invest in high-yielding bonds, if they carry a rating of at least B- at the time of acquisition. Portfolio duration should be between one and four years. The investment objective is to attain an above-average long-term return compared to the market for short duration emerging markets bonds.

Fund Manager

David Newman
(since 10/01/2018)

Richard House
(since 10/01/2018)

Daniel Ha
(since 03/31/2021)

Key Figures

Effective Duration (%)	3.02
Average nominal return (%)	4.92
Yield to worst (%) ¹⁰	6.64
Average rating	BB+

Opportunities

- + Above-average yield potential of emerging-market bonds, capital gains opportunities on declining market yields
- + Addition of high-yielding bonds enhances return potential
- + Higher price stability compared to long-term bonds
- + Broad diversification across numerous securities
- + Potential additional returns from single security analysis and active management
- + Currency gains possible with share classes not hedged against investor currency

Risks

- Interest rates vary, bonds suffer price declines on rising interest rates
- Higher risk of volatility, illiquid markets and capital loss than with high-grade government bonds. The volatility of the fund unit price may be strongly increased.
- Lower return potential compared to long-term bonds
- Limited participation in the potential of individual securities
- No guarantee of the success of single security analysis and active management
- Currency losses possible with share classes not hedged against investor currency

FOR FUND DISTRIBUTORS AND PROFESSIONAL INVESTORS ONLY

- 1) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. **Any front-end loads reduce the capital employed and the performance.**
- 2) Benchmark history: until 30/09/2021 LIBOR USD 3-Month (in USD), until 28/11/2019 LIBOR USD 3-Month (in USD), until 09/06/2019 no Benchmark (USD)
- 3) SFDR: EU Sustainable Finance Disclosure Regulation. Information accurate at time of publishing.
- 4) The Sharpe ratio states the relationship between the return generated by the fund and the investment risk. The fund's excess return versus the risk-free market rate is compared to volatility. Negative values are not meaningful.
- 5) Volatility measures the fluctuation range of the fund's performance over a specified period of time.
- 6) This is for guidance only and not indicative of future allocation.
- 7) Breakdown based on best available rating for each security. Data published by index provider are based on average ratings and may be different.
- 8) The all-in fee includes the expenses previously called management, administration and distribution fees. Any payment of a trail fee by the management company to a distribution partner will be effected from the all-in fee.
- 9) TER generally: Total cost (except transaction costs) charged to the fund during the last financial year. TER for funds-of-funds: The costs incurred by the fund itself (except transaction costs). Since the fund held other investment units ("target funds") in the reporting period, further costs, charges and fees may have been incurred at the level of the target fund.
- 10) Represents the lowest potential yield that an investor could theoretically receive on the bond up to maturity if bought at the current price (excluding the default case of the issuer). The yield to worst is determined by making worst-case scenario assumptions, calculating the returns that would be received if worst-case scenario provisions, including prepayment, call or sinking fund, are used by the issuer (excluding the default case). It is assumed that the bonds are held until maturity and interest income is reinvested on the same conditions. Calculation is before currency hedging. The yield to worst is a portfolio characteristic; in particular, it does not reflect the actual fund income. The expenses charged to the fund are not taken into account. As a result, the yield to worst is not suitable as an indicator of the future performance of a bond fund. Forecasts are not a reliable indicator of future results.

Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. Investing in fixed income instruments may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including positions with respect to short-term fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values of these instruments are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Allianz Emerging Markets Short Duration Bond is a sub-fund of Allianz Global Investors Fund SICAV, an open-ended investment company with variable share capital organised under the laws of Luxembourg. Past performance does not predict future returns. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency. This is for information only and not to be construed as a solicitation or an invitation to make an offer, to conclude a contract, or to buy or sell any securities. The products or securities described herein may not be available for sale in all jurisdictions or to certain categories of investors. This is for distribution only as permitted by applicable law and in particular not available to residents and/or nationals of the USA. The investment opportunities described herein do not take into account the specific investment objectives, financial situation, knowledge, experience or specific needs of any particular person and are not guaranteed. The Management Company

may decide to terminate the arrangements made for the marketing of its collective investment undertakings in accordance with applicable de-notification regulation. The views and opinions expressed herein, which are subject to change without notice, are those of the issuer companies at the time of publication.
