## Cumulative performance

## Monthly Comment

European markets rallied in February helped by better-than-expected results across the board and increased expectations of an end to hostilities in Ukraine. Inflows into European equities helped sustain the outperformance of the asset class. However, an announcement of tariffs for European goods continues to be a possibility. ELEVA Euroland Selection was up 2.16% vs an index up 3.44%, an underperformance of 128 bps.

Sector allocation had a slightly negative impact, due to the overweight in consumer discretionary and health care and the underweight in industrials, but that was somewhat offset by the positive impact of energy, financials and technology. Stock picking was negative, particularly in technology, communication services and financials. The lack of pure play defense names also hindered performance.

**Société Générale** clarified their capital return targets and published better than expected results, helping the stock perform materially. Other banks (**Commerzbank**, **Bawag**, **Intesa San Paolo**) continued to rally with positive comments and upgrades in their capital return expectations. **BMW** recovered this month thanks to an improved sales momentum and expectations of a postponement in the industry's CO2 targets. **Siemens** positively surprised on their key Smart Infrastructure division, highlighting a potential turnaround in automation orders after a period of weakness.

**BE Semiconductor Industries** disappointed on its outlook, with a lack of short-term recovery in its base business despite long term interest in their hybrid bonding solutions. **Capgemini** had disappointing guidance after two average years. **Publicis** delivered good results but was affected by profit warnings from peers.

Economic growth was decent in 2024, with low growth in Europe and in China balanced by an acceleration in the US. Falling inflation expectations reduce the risks of a Central Bank mistake. The macro environment was deteriorating last year, but we see now a modest inflection in Europe and a more material one in the Global and US indicator. Patience is needed in Europe for interest rates to have an impact on economic activity. In that environment we believe that corporates will still be able to grow at a moderate pace. Value and cyclical were at 52.6% and 56.4% of the fund respectively.

Since inception, ELEVA Euroland Selection is up 79.34% vs an index up 85.12%, an underperformance of 578 bps.
