## Portfolio Managers Comments

### Review

Markets continued to trade with a positive tone in February although volatility increased towards month-end. Thematically, trade and geopolitics dominated the narrative. The start of the month was marked by investor angst over potential tariffs on Mexico and Canada, followed by a relief rally when tariffs were ultimately delayed. On the geopolitical front, progress around Russia-Ukraine peace talks lent a positive tone to markets, however the situation remains complex and there have been further setbacks in early March. Regarding economic data, US CPI was higher than expected while the US Federal Reserve (Fed)'s preferred measure of inflation (core PCE) showed a marginally better picture.

In emerging-markets (EM) fixed income, performance was positive across the board. The largest February issuance on record did not derail the strong total returns, as more issuers entered the market to cover external financing needs ahead of an uncertain macro outlook. In the hard currency space, EM debt markets were up +1.51% in corporates and +1.57% in sovereigns with spreads 9 basis points (bps) wider and 12bps wider respectively. In corporates, the real estate and oil & gas sectors outperformed while infrastructure and banks were laggards. In sovereigns, Venezuela and Ukraine outperformed in spread terms although investment-grade (IG) names were the best performers in total return given the rally in core duration.

In the local markets, the index was up +0.66% on the month with local rates delivering +0.78% of return and foreign exchange (FX) marginally detracting (-0.13%). In the FX world, Asia was a clear underperformer with losses of -1% while other regions actually showed positive return. Latin America was the best performer in the rates space, with Colombia a notable outperformer. In equities, the S&P was down -1.3% in what was a decent showing given that the 'Mag 7' lost -8.7% over the month. Over in Europe, the STOXX 600 was an outperformer (+3.4%) with the prospect of higher European defence spending driving related stocks higher, while the German election results at the end of the month added further impetus to this trade.

In EM news, in Ecuador, there was a surprise first round election result where leftist and Correista-aligned candidate Luisa Gonzales came a very close second to the incumbent President Noboa, setting up a critical second round runoff for early April with a binary outcome for investors. In Senegal, a recently released audit for 2023 revealed much higher than expected figures for the fiscal balance (-12.3%) and debt/GDP (100%), causing some investor concern. Finally, in Ukraine, negotiations picked up around a minerals deal with the US which may be one piece of the puzzle as parties search for a workable ceasefire deal that also includes security guarantees.

### Performance [Fund performance is gross of fees. Past performance is not indicative of future results]

The fund returned +0.41% in February, taking year-to-date returns to +3.51%.

The main driver of positive performance was positioning in local currency where long FX positions in the Kazakhstani tenge, Brazilian real, and Chilean peso along with a short position in the Thai baht all contributed positively. EM rates markets found support from the rally in US rates, and the broadly speaking still relatively benign domestic inflation stories. As such, a received stance in Mexico, South Africa, and Colombia were the key performers.

In credit, longs in Colombia and Mexico were the top performers along with hedges in US rates. A long in Ecuador detracted from returns after an unexpected outcome in the first round of the presidential election, which left the reform story under threat as the perceived non-market-friendly candidate outperformed expectations.

### Outlook

March has kicked off with a whirlwind of economic and policy shifts with investors scrambling to keep up. Markets continue to grapple with the Trump agenda that is moving extremely quickly and with predictable unpredictability. Tariffs have frequently been threatened, sometimes levied, and often are reversed almost as quickly as they have been enacted. Geopolitics has also been difficult to read; arms supplies to Ukraine have been stopped overnight after years of American military support for the country, and the US administration is seemingly ceding to Russian propaganda around the origins of the war. While all of this may be designed to extract concessions from friends and foes alike, it creates an environment of significant uncertainty which promotes caution in decision making, ultimately weighing on growth.

Over the last few days, there has also been a seismic shift in fiscal policy in Europe. In particular, the German government has made significant changes, agreeing to setup a EUR 500bn Special Purpose Vehicle (SPV) for infrastructure investment and to exempt defence spending above 1% of GDP from the debt brake. The EU has also announced proposals that would allow member states to increase defence spending without triggering EU deficit rules, along with proposing EUR 150bn of loans for defence spending. This news juxtaposes with the negative sentiment around the US in light of the unpredictable policymaking from the Trump administration, which is clearly weighing on consumer sentiment in addition to company decisions around planning and capex. These moves have pushed up Bund yields, along with other European rates markets, as well as driving a significant move higher in EUR/USD, while the size of these packages indicate that these market moves have strong momentum that is likely to continue.

Amidst the uncertainty, EM fixed income has been supported by the increased pricing of Fed cuts and a more stable US Treasury curve as markets have started to price in a more conservative fiscal stance in the US as well as a fading of the US exceptionalism theme. Large shifts in the European fiscal stance have also begun to support EM FX vs the USD; there is a knock on impact to growth, and policy uncertainty in the US is pushing the market towards a more dovish pricing of the Fed. As we look ahead, while we expect market volatility to be elevated given the unpredictable policy mix, we do expect that EM fixed income performance will be supported by solid fundamental anchors and healthy relative valuations with all-in yields remaining attractive relative to peers.

## Risk Considerations

- At times, the market for emerging market bonds may dry up, which could make it difficult to sell these bonds, or the fund may only be able to sell them at a discount
- There may be cases where an organisation with which we trade assets or derivatives (usually a financial institution such as a bank) may be unable to fulfil its obligations, which could cause losses to the fund
- Investing in emerging market bonds offers you the chance to gain higher returns through growing your capital and generating income. Nevertheless, there is a greater risk that the organisation which issued the bond will fail, which would result in a loss of income to the fund along with its initial investment
- Emerging markets may be more volatile and it could be harder to sell or trade these bonds. There is also a greater risk of less government supervision, legal regulation and less well-defined tax laws and procedures than in countries with more developed trading markets. Emerging markets can be particularly sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses
- RBC BlueBay could suffer from a failure of its processes, systems and controls – or from such a failure at an organisation on which we rely in order to deliver our services – which could lead to losses for the fund
- RBC BlueBay's analysis of ESG/Sustainability factors can rely on input from external providers. Such data may be inaccurate or incomplete or unavailable and RBC BlueBay could assess the ESG/Sustainability risks of securities held incorrectly.

## Key Terms

**Article 6 (SFDR):** Financial products, not falling into either the Article 8 or 9 category. Where such products deem sustainability risks to be relevant to the returns of the product, the regulation requires transparency of the integration of sustainability risks. Where such risks are not deemed relevant, the regulation requires an explanation of the reasons. Such products are not subject to any of the additional transparency required for Article 8 or 9 products.

**Article 8 (SFDR):** Financial products where sustainable investment is not the objective, but they are promoting environmental or social characteristics (or a combination of those characteristics), provided that the companies in which the investments are made follow good governance practices. The regulation requires such products to have additional transparency on the promotion of environmental or characteristics.

**Article 9 (SFDR):** Financial products with sustainable investment as its objective. The regulation requires such products to have additional transparency of sustainable investments.

**Environmental, social & governance (ESG):** A set of aspects, environmental, social and governance related, that may be considered in investment. How ESG considerations are taken into account will differ for each fund. ESG integration is the incorporation of material ESG factors into investment decision making with an aim to identify potential risks and opportunities and improve long-term, risk-adjusted returns. Note: Certain exposure and security types do not integrate ESG factors, including but not limited to certain currency or derivative instruments. Please read a fund's prospectus for further details.

**SFDR:** An EU regulation on sustainability-related disclosures. It sets out rules for financial market participants and financial advisers on transparency with regulation to the integration of sustainability risks and the consideration of adverse sustainability impacts in their processes and the provision of sustainability-related information with respect to financial products.

### Notes:

- 1 Fund name changed from BlueBay Emerging Market Absolute Return Bond Fund on 17/09/2018.
- 2 While gross of fee figures would reflect the reinvestment of all dividends and earnings, it would not reflect the deduction of investment management and performance fees. An investor's return will be reduced by the deduction of applicable fees which will vary with the rate of return on the strategy. For example, if there was an annualised return of 10% over a 5-year period then the compounding effect of a 0.60% management fee and a 0.20% performance fee would reduce the annualised return to 9.32% (figures used are only to demonstrate the effect of charges and are not an indicator of future performance). In addition, the typical fees and expenses charged to a strategy will offset the strategy's trading profits. A description of the specific fee structure for each BlueBay strategy is contained in the strategy's prospectus
- 3 Risk statistics are annualized and calculated using weekly data points since inception. Risk statistics will be produced once there are 12 complete months of data available; for meaningful results a minimum sample of 36 data points is recommended and where history is less than 3 years caution should be taken with the interpretation and representation of this data. Returns for periods of less than 1 year have not been annualized in accordance with current industry standard reporting practices
- 4 Exposure is calculated by dividing positions (gross long, gross short, net) by NAV, with exposure measured by market value for cash products, ten year bond equivalents for interest rate derivatives and delta adjusted notionals for other derivatives
- 5 The Fund AuM is stated on a T+1 basis and includes non-fee earning assets
- 6 Weighted Yield to Maturity (%) excludes distressed names.
- 7 Fundamental ESG (Risk) Rating: ESG evaluations generate two ESG metrics, with both metrics are derived from a proprietary framework applied by the BlueBay fixed income platform. One being the Fundamental ESG (Risk) Rating, which is assigned at an issuer level. Categories range from 'very high' ESG (Risk) Rating to 'very low' ESG (Risk) Rating and is a function of the ESG risk profile of an issuer and how well it manages these risks. ESG evaluations are only completed for in scope strategies, for specific issuer and security/instrument types and certain investment exposures.
- 8 Investment ESG Score: ESG evaluations generate two ESG metrics, with both metrics are derived from a proprietary ESG framework applied by the BlueBay fixed income platform. One being the Investment ESG Score, which refers to the extent to which the ESG risk factors the issuer is exposed to are considered to have any financial/investment relevance and materiality. Scores range from '+3' through to '-3' indicates the extent to which ESG is considered investment material, as well as the nature and likely magnitude of the investment impact. An 'indicative' Investment ESG Score is the assigned score at the time of initial ESG analysis and is more reflective of issuer level investment materiality of the ESG risks as there is not necessarily a specific security being considered for investment. For this reason, the actual 'security' level Investment ESG Score assigned for a specific investment may be different from the indicative one assigned, as that is more reflective of the view of ESG risks at an issue/instrument level. ESG evaluations are only completed for in scope strategies, for specific issuer and security/instrument types and certain investment exposures.

This document is a marketing communication and it may be produced and issued by the following entities: in the European Economic Area (EEA), by BlueBay Funds Management Company S.A. (BBFM S.A.), which is regulated by the Commission de Surveillance du Secteur Financier (CSSF). In **Germany, Italy, Spain and Netherlands** the BBFM S.A. is operating under a branch passport pursuant to the Undertakings for Collective Investment in Transferable Securities Directive (2009/65/EC) and the Alternative Investment Fund Managers Directive (2011/61/EU). In the **United Kingdom (UK)** by RBC Global Asset Management (UK) Limited (RBC GAM UK), which is authorised and regulated by the UK Financial Conduct Authority (FCA), registered with the US Securities and Exchange Commission (SEC) and a member of the National Futures Association (NFA) as authorised by the US Commodity Futures Trading Commission (CFTC). In **Switzerland**, by BlueBay Asset Management AG where the Representative and Paying Agent is BNP Paribas Securities Services, Paris, succursale de Zurich, Selnaustrasse 16, 8002 Zurich, Switzerland. The place of performance is at the registered office of the Representative. The courts at the registered office of the Swiss representative or at the registered office or place of residence of the investor shall have jurisdiction pertaining to claims in connection with the offering and/or advertising of shares in Switzerland. The Prospectus, the Key Investor Information Documents (KIDs), the Packaged Retail and Insurance-based Investment Products - Key Information Documents (PRIIPs KID), where applicable, the Articles of Incorporation and any other document required, such as the Annual and Semi-Annual Reports, may be obtained free of charge from the Representative in Switzerland. In **Japan**, by BlueBay Asset Management International Limited which is registered with the Kanto Local Finance Bureau of Ministry of Finance, Japan. In **Asia**, by RBC Global Asset Management (Asia) Limited, which is registered with the Securities and Futures Commission (SFC) in Hong Kong. In **Australia**, RBC GAM UK is exempt from the requirement to hold an Australian financial services license under the Corporations Act in respect of financial services as it is regulated by the FCA under the laws of the UK which differ from Australian laws. In **Canada**, by RBC Global Asset Management Inc. (including PH&N Institutional) and /or RBC Indigo Asset Management Inc. which is regulated by each provincial and territorial securities commission. RBC GAM UK is not registered under securities laws and is relying on the international dealer exemption under applicable provincial securities legislation, which permits RBC GAM UK to carry out certain specified dealer activities for those Canadian residents that qualify as "a Canadian permitted client", as such term is defined under applicable securities legislation. In the **United States**, by RBC Global Asset Management (U.S.) Inc. ("RBC GAM-US"), an SEC registered investment adviser. The entities noted above are collectively referred to as "RBC BlueBay" within this document. The registrations and memberships noted should not be interpreted as an endorsement or approval of RBC BlueBay by the respective licensing or registering authorities. Not all products, services or investments described herein are available in all jurisdictions and some are available on a limited basis only, due to local regulatory and legal requirements.

Please refer to the Prospectus of the fund, the Key Investor Information Documents (KIID) and the Packaged Retail and Insurance-based Investment Products - Key Information Documents (PRIIPs KID), if available, or any other relevant fund documentation on our website ([www.rcbbluebay.com](http://www.rcbbluebay.com)) before making any final investment decisions. The Prospectus and the PRIIPs KID is available in English and the KIIDs in several local languages. No RBC BlueBay fund will be offered, except pursuant and subject to the offering memorandum and subscription materials for such fund (the "Offering Materials"). If there is an inconsistency between this document and the Offering Materials for the RBC GAM UK fund, the provisions in the Offering Materials shall prevail.

Any investor who proposes to subscribe for an investment in any of the RBC BlueBay products must be able to bear the risks involved and must meet the respective products suitability requirements. This document is intended only for "professional clients" and "eligible counterparties" (as defined by the Markets in Financial Instruments Directive ("MiFID")) or in the US by "accredited investors" (as defined in the Securities Act of 1933) or "qualified purchasers" (as defined in the Investment Company Act of 1940) as applicable and should not be relied upon by any other category of customer.

The investments discussed may fluctuate in value and you may not get back the amount invested. The return may increase or decrease as a result of currency fluctuations. Investment in derivatives may involve a high degree of gearing or leverage, so that a relatively small movement in the price of the underlying investment results in a much larger movement in the price of the instrument, as a result of which prices are more volatile. There are restrictions on transferring interests in the funds. The instruments in which the products invest may involve complex tax structures and there may be delays in distributing important tax information. The funds are not required to provide periodic pricing or valuation information to investors with respect to its individual investments.

Unless otherwise stated, performance data is unaudited and net of management, performance and other fees. Past performance is not indicative of future results.

Any indices shown are presented only to allow for comparison of the RBC BlueBay fund's performance to that of certain widely recognised indices. The volatility of the indices may be materially different from the individual performance attained by a specific fund or investor. In addition, the RBC BlueBay fund holdings may differ significantly from the securities that comprise the indices shown. Indexes are unmanaged and investors cannot invest directly in an index.

This document has been prepared solely for informational purposes and does not constitute an offer or recommendation to buy or sell any security or investment product or adopt any specific investment strategy in any jurisdiction. This document should not be construed as tax or legal advice.

This document may contain the current opinions of RBC BlueBay and is not intended to be, and should not be interpreted as, a recommendation of any particular security, strategy or investment product. Unless otherwise indicated, all information and opinions herein are as of the date of this document. All information and opinions herein are subject to change without notice.

The information contained in this document has been compiled by RBC BlueBay, and/or its affiliates, from sources believed to be reliable but no representation or warranty, express or implied is made to its accuracy, completeness or correctness.

A summary of investor rights can be obtained in English on [www.rcbbluebay.com/investorrights](http://www.rcbbluebay.com/investorrights). It is important to note that the Fund Management Company may terminate arrangements for marketing under new Cross-border Distribution Directive denotification process. There are several risks associated with investing in financial products. With all investments there is a risk of loss of all, or a portion of the amount invested. Recipients are strongly advised to make an independent review with their own advisors and reach their own conclusions regarding the investment merits and risks, legal, credit, tax and accounting aspects of all transactions.

The investment products described herein may be private investment funds, registered funds, and/or managed accounts, collectively referred to as "Alternative Investments." Such investments may invest and trade in many different markets, instruments or may utilize different strategies than used by traditional investments. Such trading methodologies are dependent upon their Alternative Investment's investment objectives. These are NOT subject to the same regulatory requirements as mutual funds, including such funds' requirement to provide certain periodic and standardized pricing and valuation information to investors. There are substantial risks with investing in Alternative Investments. Each Fund's Offering Documents contain important information concerning risk factors, including a more comprehensive description of the risks and other material aspects of the investment (including a Fund's investment program and applicable fees and expenses), and should be read carefully before any decision to invest is made by you.

You should carefully note the following:

- An Alternative Investment represents a speculative investment and involves a high degree of risk. Investors must have the financial ability, sophistication, experience and willingness to bear the risks of an investment in an Alternative Investment. An investor could lose all or a substantial portion of his/her/its investment.
- An investment in an Alternative Investment should be discretionary capital set aside strictly for speculative purposes.
- An investment in an Alternative Investment is not suitable for all investors. Only qualified eligible investors may invest in an Alternative Investment.
- An Alternative Investment's offering documents are not reviewed or approved by federal or state regulators and its privately placed interests are not federally or state registered.
- An investment in and Alternative Investment may be illiquid and there are significant restrictions on transferring or redeeming interests in an Alternative Investment. There is no secondary market for an investor's investment in an alternative investment and none is expected to develop. Substantial redemptions by shareholders within a limited period of time could compel an Alternative Investment to liquidate its positions more rapidly than otherwise would be desirable, which could adversely affect the value of the distribution proceeds and the value of the remaining interests in an Alternative Investment.
- The net asset value of an Alternative Investment may be determined by its administrator in consultation with its manager or advisor in certain cases. Certain portfolio assets may be illiquid and without a readily ascertainable market value. Since the value assigned to portfolio investments affects a manager's or advisor's compensation, the manager's or advisor's involvement in the valuation process creates a potential conflict of interest. The value assigned to such portfolio investments may differ from the value an Alternative Investment is able to realize.
- An Alternative Investment's manager or advisor has total trading authority over the Alternative Investment. The death or disability of the manager or advisor, or their departure, may have a material adverse effect on an Alternative Investment. The use of a single advisor applying generally similar trading programs could mean lack of diversification and, consequently, higher risk.
- An Alternative Investment may use a complex tax structure, which should be reviewed, and may involve structures or strategies that may cause delays in important tax information being sent to investors.
- The Alternative Investment's fees and expenses which may be substantial regardless of any positive return will offset such Alternative Investment's trading profits. If an Alternative Investment's investments are not successful, these payments are expenses may, over a period of time, deplete the net asset value of an Alternative Investment.
- An Alternative Investment and its managers/advisors may be subject to various conflicts of interest.
- The fund may be leveraged.
- The fund's performance can be volatile.
- A substantial portion of the trades executed for the fund takes place on foreign exchanges
