

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 8th April 2019 is that of the Fund's A1 USD Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars USD Strategy, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears, inception 1st October 2012. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI World Total Return Index reflects large and mid-cap issuers across 23 developed markets countries and is the benchmark for the Strategy. The total return index includes price performance and income after tax from regular cash distributions. Source: SIX, Wize, Bloomberg, J. Stern & Co.

Portfolio Comment

Our World Stars Global Equity fund continued to perform strongly in June. Digital companies accounted for seven of the top ten stocks while industrial companies did less well after significant gains earlier this year and consumer stocks suffered from concerns around slower consumer spending. For several stocks valuations have now fallen to well below their historic averages.

The macroeconomic backdrop saw further reductions in CPI in major economies, easing labor markets and slowing but still robust consumer spending. The ECB cut rates by 25bps to 3.75%. In its latest forecasts, the US Fed pointed to just one rate cut in 2024 as it aims to slow the US labor market but four further cuts in 2025.

Adobe (+25%) reported 11% revenue growth in Q2, higher EBIT margins of 46%, and raised its full year guidance. Innovative new products and the addition of generative AI to apps such as Photoshop are driving incremental revenues. Its Document Cloud (Acrobat) also continues to grow strongly. These innovations should strengthen Adobe's product differentiation and support its long-term growth outlook.

Roche (+8%) announced promising results in Phase 1 trials of its CT-388 treatment for obesity and type 2 diabetes. This adds to expectations of a catalyst-rich period for Roche through 2024-25 with clinical readouts from other drugs in development including Giredestrant for breast cancer, Trontinemab for Alzheimer's and Prasinezumab for Parkinson's disease.
