KEY RISKS

Credit Risk: Risks associated with issuers of debt securities, even those with a very high rating, may not be able to make payments to investors, or the fear associated with this risk may result in a decrease in the value of their debt securities.

Emerging Market Risk: Risks associated with investing in emerging markets. Due to their political instability, the volatility of the exchange rate of their currencies, and the limited number of investment opportunities, the risk of these markets is greater than in countries considered as developed.

ESG Strategy Risk: Risks associated with investment policies that take an ESG approach. The use of ESG criteria can affect the performance of a Sub-fund, which may, therefore, differ from that of other Sub-funds with similar investment policies but which do not take ESG criteria into account.

Disclosure

This fund promotes environmental and/or social characteristics within the meaning of Article 8(1) of the SFDR Regulation, and is required to maintain an overall ESG rating of at least BBB at portfolio level. The ESG rating is based on MSCI ESG Research data and methodology. Legend: 4 green leaves = AAA; 3 green leaves = AA; 2 green leaves = A; 1 green leaf = BBB; 1 grey leaf = BB, B, CCC or rating not available.

The value of investment interests can fall as well as rise. Any capital invested may be at risk and you may not get back some or all of your original capital. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested.

The term "Cash Offset" represents a technical entry used to balance the exposure generated by the derivative instruments in the portfolio and bring the total portfolio back to 100%.
