What is this product?

Type

This is an investment fund established as a Company With Variable Capital (SICAV).

Objectives

Investment objective The investment objective of the Sub-fund is long-term capital appreciation through holding a portfolio of companies that derive the majority of their revenues and/or profits from "Consumer Alpha™" goods or service.

Investment policies The Sub-fund seeks to achieve this goal by investing in a portfolio generally comprised of at least 40 best-inclass "Consumer Alpha™" businesses from around the world. The Investment Manager seeks to target companies which it considers benefit from advantaged cashflows and the potential to generate rates of return in excess of their respective cost of capital. In particular, the Investment Manager seeks to invest in companies where it believes revenue growth and/or elevated profit margins of such companies will lead to the consistent compounding of these cashflows over the long-term. The Sub-fund may enter into Securities Financing Transactions in pursuit of the Sub-fund's investment strategy. The types of assets that may be subject to Securities Financing Transactions will be of a type which is consistent with the investment policy of the Sub-fund, including equities and bonds.

The Investment Manager does not expect the maximum proportion and expected proportion of the Net Asset Value of the Sub-fund which may be invested in each type of Securities Financing Transaction to exceed the following levels:

- Securities Lending Transaction: 50%
- Buy-sell back and sell-buy back transactions: 50%
- Repurchase and reverse repurchase transactions: 50%

The Sub-fund may enter into FDIs and/or Securities Financing Transactions with brokers and/or other counterparties (each a "Trading Counterparty"). All counterparties to Securities Financing Transactions will be established in a member state of the OECD, will be regulated in their home jurisdiction and will have a minimum long-term credit rating of at least A2 or equivalent. All revenues (less transaction costs and dealing commissions) from Securities Financing Transactions accrue to the Sub-fund.

The level of leverage for the Sub-fund is typically expected to range from 350% to 400% of its Net Asset Value. However, Sub-fund's leverage may increase to higher levels.

The Sub-fund may enter into currency hedging transactions.

Benchmark The Sub-fund is managed actively without reference to any benchmark.

Redemption and Dealing Investors may subscribe, convert or redeem on a daily basis.

Distribution Policy Any income arising from the share class is reinvested.

Launch date The Sub-Fund was launched on 06/06/2016 and this share class was launched on 06/04/2020.

Fund Currency The reference currency of the Sub-Fund is the LISD

Conversion of units/shares Subject to the qualifications for investment being met and the consent of the Board of Directors, Shareholders may switch Shares of a Class of the Fund into Shares of another Class of Fund or of another Sub-Fund without any charge.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIP manufacturer, Waystone Management Company (Lux) S.A., is not entitled to terminate the product unilaterally.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at www.waystone.com/our-funds/waystone-management-company-lux-s-a/.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 30 April 2021 and 31 January 2024.

Moderate: this type of scenario occurred for an investment between 30 April 2015 and 30 April 2020.

Favourable: this type of scenario occurred for an investment between 26 February 2016 and 26 February 2021.

What happens if Waystone Management Company (Lux) S.A. is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Fund default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

■ in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ 10,000 USD is invested.
