

# Allianz Global Income - AMg - USD

Fund for global bonds and equities from the U.S.

## Investment Objective

The fund mainly invests in global equities and bonds. The exposure to emerging markets and high-yield bonds is restricted to 30 % resp. 50 %. Non-USD currency exposure exceeding 20 % of fund assets is to be hedged against US-dollars. The investment objective is to attain capital growth and regular income over the long term.

## Opportunities

- + Particular yield potential of equities, high-yield bonds and emerging markets bonds
- + Capital gain opportunities on declining market yields
- + Broad diversification across numerous securities
- + Potential additional returns from security analysis and active management
- + Potential currency gains with share classes not hedged against investor currency

## Risks

- Equities, emerging markets and high-yield bonds entail above-average risk of volatility, illiquid markets and capital loss. The volatility of fund unit prices may be strongly increased.
- Interest rates vary, bonds suffer price declines on rising interest rates.
- Limited participation in the potential of individual securities
- Success of single security analysis and active management not guaranteed
- Potential currency losses with share classes not hedged against investor currency

## FOR FUND DISTRIBUTORS AND PROFESSIONAL INVESTORS ONLY

- 1) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. **Any front-end loads reduce the capital employed and the performance.**
- 2) SFDR: EU Sustainable Finance Disclosure Regulation. Information accurate at time of publishing.
- 3) The Sharpe ratio states the relationship between the return generated by the fund and the investment risk. The fund's excess return versus the risk-free market rate is compared to volatility. Negative values are not meaningful.
- 4) Volatility measures the fluctuation range of the fund's performance over a specified period of time.
- 5) This is for guidance only and not indicative of future allocation.
- 6) If the acquisition of Fund units is subject to a sales charge, up to 100% of such sales charge may be collected by the distributor; the exact amount shall be mentioned by the distributor as part of the investment advisory process. This also applies to any payment by the Management Company of an ongoing distribution fee from the all-in fee to the distributor. The all-in fee includes the expenses previously called management, administration and distribution fees.
- 7) TER generally: Total cost (except transaction costs) charged to the fund during the last financial year. TER for funds-of-funds: The costs incurred by the fund itself (except transaction costs). Since the fund held other investment units ("target funds") in the reporting period, further costs, charges and fees may have been incurred at the level of the target fund.

### Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. Investing in fixed income instruments may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including positions with respect to short-term fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values of these instruments are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Allianz Global Income is a sub-fund of Allianz Global Investors Fund SICAV, an open-ended investment company with variable share capital organised under the laws of Luxembourg. The value of the units/shares which belong to the Unit/Share Classes of the Sub-Fund that are denominated in the base currency may be subject to an increased volatility. The volatility of other Unit/Share Classes may be different and possibly higher. Past performance does not predict future returns. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency.
