## Fund overview

**Objective:** To earn income and increase the value of the Shareholder's investment, while outperforming the Benchmark over the long term (5 years or more).

**Investments:** The Sub-Fund invests at least 70% of total net assets (excluding cash and cash equivalents) in bonds of companies from anywhere in the world responding to climate change which meet the Investment Manager's eligibility criteria as described below (the "core investment"). In this core investment the Sub-Fund excludes fossil fuel companies and has two investment sleeves: • Solutions sleeve, which will invest in investment grade corporate bond issuers whose goods and services provide solutions for climate change mitigation and adaptation; • Transition sleeve, which allocates to investment grade companies positively aligning to and orientating their business models to be resilient in a warmer climate and a low-carbon economy. Bond investments may include asset-backed securities (ABS) and mortgage backed securities (MBS) which are typically invested in European and North American markets.

**Strategy:** Companies will be identified as eligible for core investment if they satisfy the "Solutions" or "Transitions" criteria and are not excluded on the basis of their fossil fuel activities using the following criteria:

- > 0% revenues from thermal coal, unconventional fossil fuels, Arctic gas & oil production or thermal coal electricity generation;
- > 0% Thermal Coal Reserves (metric tonnes);
- > 0% Unconventional Oil and Gas reserves (mmboe);
- > / = 1000 Total Oil and Gas reserves (mmboe);
- > / = 10% revenues from oil & gas production and liquid fuels electricity generation;
- > / = 15% revenues from natural gas electricity generation;
- > / = 75% revenues from Oil and Gas Distribution & Retail, Equipment & Services, Petrochemicals, Pipelines and Transportation, Refining or Trading. The Investment Manager will also exclude direct investments in companies which manufacture products that seek to do harm when used as intended.

Please note that this is a hedged share class, and due to interest rate differential and costs associated with performing the hedging activity, this share class will have a different outcome to the equivalent share class in the base currency. Sustainable Finance Disclosure

Environmental, Social & Governance factors (ESG) and Sustainability Risk indicators are integrated into the investment process and are a key determinant based on which companies are selected. This Fund does promote environmental or social characteristics, however it does not have a sustainable investment objective. All investments that are selected as part of the Investment Manager's ESG analysis must follow good governance practices, and not be excluded by the Investment managers ESG Baseline Exclusions Policy. The investment manager integrates qualitative and quantitative data on adverse sustainability impacts into its investment process to measure whether the environmental or social characteristics promoted by the Fund have been achieved. These metrics, known as Principle Adverse Impact's or ("PAI") (as defined by the Sustainable Finance Disclosure Regulation) are the sustainability indicators used by the Fund. There is no guarantee this data will show an annual improvement over time, and therefore the Fund could have worse PAI metrics than previous periods or, compared to the index or other Funds. Additional information regarding Taxonomy Regulation compliance is available under the section "Taxonomy Regulation Disclosures". Further information regarding how the Investment Manager integrates ESG into its investment approach, its proprietary ESG model and how it engages with companies is available under the "Responsible Investment" section of the Prospectus and on the website [www.avivainvestors.com](http://www.avivainvestors.com). This product is based outside the UK and is therefore not subject to UK sustainable investment labelling and disclosure requirements.

Fund risks

**Investment risk & currency risk:** The value of an investment and any income from it can go down as well as up and can fluctuate in response to changes in currency and exchange rates. Investors may not get back the original amount invested.

**Credit and interest rate risk:** Bond values are affected by changes in interest rates and the bond issuer's creditworthiness. Bonds that offer the potential for a higher income typically have a greater risk of default

**Illiquid securities risk:** Some investments could be hard to value or to sell at a desired time, or at a price considered to be fair (especially in large quantities), and as a result their prices can be volatile.

**Counterparty risk:** The Fund could lose money if an entity with which it does business becomes unwilling or is unable to meet its obligations to the Fund.

**Derivatives risk:** Derivatives are instruments that can be complex and highly volatile, have some degree of unpredictability (especially in unusual market conditions), and can create losses significantly greater than the cost of the derivative itself.

**Sustainability Risk:** The level of sustainability risk may fluctuate depending on which investment opportunities the Investment Manager identifies. This means that the fund is exposed to Sustainability Risk which may impact the value of investments over the long term.

Full information on risks applicable to the Fund are in the Prospectus and the Key Investor Information Document (KIID).

Glossary

**Annualised performance**  
An annualised total return is the geometric average amount of money earned by an investment each year over a given time period.

**Volatility (%)**  
A measure of the fund's dispersion of returns. A higher volatility implies that a fund's return is spread over a larger range of values whilst a lower volatility implies that a fund's return is spread over a smaller range of values.

**Distribution yield**  
This reflects the amount that is expected to be distributed over the next 12 months as a percentage of the share price of the fund on the date shown. It does not include the deduction of entry charges and is the gross return before tax on distributions. You may be subject to further tax on your distributions. The yield is not guaranteed.

**Entry fee**  
A one-off charge may be taken from your money before it is invested. The charge is usually a percentage of the amount invested and is additional to the price paid for the units/shares. The entry charge is deducted from the investment before units/shares are bought and is also known as the "initial charge".

**Exit charge**  
A one-off charge levied on redemption of units/shares before the proceeds of your investment are paid out. This is also known as a "redemption charge".

**Ongoing charge**  
The ongoing charge figure represents the costs you can expect to pay annually based on last year's expenses. The ongoing charges figure is made up of various elements such as the fund management fee, professional fees, audit fees and custody fees. Performance fees (if payable) are not included in this figure.

**Performance fee**  
The percentage of any outperformance of the hurdle rate and/or benchmark that will be taken as a performance fee.

**Tracking error (%)**  
A measure of how closely the fund follows its benchmark. A passive fund should have a tracking error close to zero, while an actively managed fund would normally have a higher tracking error.

**NAV**  
NAV is typically an End Of Day valuation using close of market prices to value the individual securities with the portfolio or fund, rolling up to a total portfolio or fund level.

**Underlying yield**  
This reflects the annualised income net of expenses of the fund as a percentage of the share price of the fund on the date shown. It does not include the deduction of entry charges and is the gross return before tax on distributions.

**Time to Maturity**  
This shows the time remaining to maturity of the bonds held by the fund. Generally, the longer the duration of a holding is, the greater the price's sensitivity to any changes in interest rates.

**Credit Rating**  
Independent ratings agencies assign different ratings to bonds depending on the bond issuers' financial strength and their outlook as well as their ability to pay interest on time and meet all of their liabilities. We use appropriate industry recognised ratings as detailed in source notes.

**Modified duration**  
A calculation that expresses the measurable change in the value of a security in response to a change in interest rates - (under analysis).

**Spread Duration**  
The Spread Duration measures the sensitivity of a security's price to changes in its Option Adjusted Spread (OAS) relative to the Treasury Curve.

**Management Fee**  
The management fee is fixed rate charge to cover the costs of managing the investments of the fund. It accrues daily based on a percentage of the fund's net asset value and deducted from the fund's assets.

*Note for UK Investors: This Fund is domiciled in Luxembourg and is authorised by the Commission de Surveillance du Secteur Financier (CSSF). The Fund is recognised in the UK under the Overseas Funds Regime but is not a UK-authorised Fund and therefore **is not subject to UK sustainable investment labelling disclosure requirements**. UK investors should be aware that they can make a complaint about the fund, its management company, or its depositary. However, complaints may not be eligible for resolution by the UK's Financial Ombudsman Service and any claims for losses related to the management company or depositary will not be covered by the Financial Services Compensation Scheme (FSCS). UK investors should consider seeking their own financial advice before making any decisions to invest and refer to the scheme prospectus for further information.*
