The fund has sustainable investment as its objective as set out in article 9 of the SFDR. The sustainable investment objectives of the fund are to:

- Finance solutions that enhance child prosperity
- Promote a safe and clean environment for children
- Contribute to the transition to an economy where all children can enjoy a prosperous life.

Triodos Future Generations Fund invests in shares of listed companies that support an ecosystem of equal opportunity, health and well-being, education and safety for children.

We select companies that, through their products, services or processes, materially contribute to the welfare of children across the world by addressing at least one of the following areas: child health and survival, access to education, protection from violence and exploitation, environment and climate, and equality and inclusion. Additionally, the companies we invest in must comply with the Triodos minimum standards. This product is not without risks. Please see the prospectus and the KID for more detail.

#### **Highlights**

- Triodos Future Generations Fund generated a return (after costs) of 4.19%, while the benchmark yielded 3.23%.
- 2025 started well for equity investors. Incoming US inflation data supported
  further loosening of monetary policy and the inauguration of Donald Trump did
  not deliver tariff fireworks (yet). Contrary to expectations, European equity
  markets outperformed the US. Small- and mid-caps performed a little bit better
  than large caps. Towards the end of the month, Chinese generative AI app
  DeepSeek caused a stir in equity markets and led to some rotation away from
  tech and into other sectors.
- The fund performed very well in January. Performance was driven by the Consumer Discretionary sector where another strong earnings report from Stride had a significant positive impact on the performance. The fund's biggest exposures are the Health Care and Industrials sectors.

#### **Net Return in %**

As per end of January 2025

|           | 1M   | 3M   | YTD  | 1 Y   | 3Y avg | 5Y avg |

Nordic Swan Ecolabel

#### Principal Adverse Impact Indicators (PAIs)

GHG intensity of investee companies: The GHG intensity is a relative measure of greenhouse gas (GHG) emissions. It is the amount of GHG produced per unit of revenue generated by the company, measured in tonnes of CO2 per EURm generated in revenue. The carbon intensity is then weighted using the portfolio weight to get a weighted average for the portfolio. Non-recycled waste ratio: For each company the non-recycled waste ration is the total amount in metric tons of non-recycled waste produced dividend by the amount invested in EURm. This is expressed as a weighted average.

Excessive CEO pay ratio: This metric measures the ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees.

#### Risks

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level. The product may be exposed to risks, such as concentration risk, currency risk and small- and mid-cap equity risk. This product does not include any protection from future market performance so you could lose some or all of your investment.

When investing in the fund, please take into account all the characteristics and/or objectives of the promoted fund as described in its prospectus. Further, please take notice of the sustainability aspects of the fund as found here.
