## Investment / Performance Objectives & policy

The fund mainly invests in equities of companies whose activities are related to the infrastructure industry such as infrastructure ownership, management, construction, operation and utilisation, or that are financing such activities. These companies may be from anywhere in the world, including China and other emerging markets. The fund generally favours direct investment but may at times invest through derivatives. Specifically, the fund normally invests at least 70% of total net assets in equities and equity-related instruments, including convertible bonds. The fund may invest across any market capitalisation. The fund may invest through the Hong Kong Stock Connect programme. The fund may also invest in real estate investment trusts (REITs). The fund may invest in the following asset classes up to the percentages of total net assets indicated:  
- emerging market equities: 20%.

For more information read the Prospectus or Key Information Document (KID).

Reference period: YTD (year to date) from 01/01/2024 to the date of this reporting. The returns calculations do not take into account taxes applicable to an average professional client in his or her country of residence. When the currency presented differs from yours, there is a currency risk that may result in a decrease in value.

## Risk and Reward Profile

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions are could impact the capacity to pay you.

For any further details on investment risks, please refer in particular to the Risks section of the Fund's Prospectus.

Data as of 06/30/2024

Sustainability characteristics

ESG score

The ESG score considers environmental, social and governance factors based on data on the individual issuer provided by MSCI ESG, which are then aggregated according to the underlying securities in the portfolio. The same methodology is also applied to the product benchmark.

**SFDR Category**  
**Article 8**

The fund is qualified pursuant to Article 8 of Regulation (EU) 2019/2088; see the Sustainability Report for more details.

ESG score  
Eurizon Fund - Global Equity Infrastructure Z

ESG score  
Benchmark

Percentage of issuers involved in controversial sectors

Percentage of critical issuers

Carbon footprint

Values other than zero may be due to (i) discontinued issuers, in the best interest of participants and in accordance with current legislation, (ii) issuers for which an engagement activity is in progress or (iii) indirect exposures.

Source: Internal processing of data provided by MSCI ESG Research  
Survey period: 12-month rolling average

Appendix

Percentage of issuers involved in controversial sectors

Issuers operating in sectors deemed controversial (not "socially responsible"), to which restrictions or exclusions apply with respect to the entirety of the individual assets under management, are companies (i) that have a clear direct involvement in the manufacture of unconventional weapons; (ii) at least 25% of whose turnover is generated from thermal coal mining or power generation activities; (iii) at least 10% of whose turnover is generated from the exploitation of oil sands.

More specifically, unconventional weapons are understood as: anti-personnel mines; cluster bombs; nuclear weapons\*; impoverished uranium; biological weapons; chemical weapons; stealth cluster bombs; blinding lasers; incendiary weapons; white phosphorus.

These provisions do not apply to the activities permitted by the following treaties and/or conventions:

- The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines; the Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster bombs;
- The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons;
- The Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons;
- Regulation (EU) 2018/1542 concerning restrictive measures against the proliferation and use of chemical weapons;

These exclusions are also intended to comply with the requirements established by Law no. 220 of 9 December 2021 on measures to counter the financing of companies producing antipersonnel mines, cluster bombs and submunitions.

\*With regard to exclusions on nuclear weapons, issuers based in states that have adhered to the "Nuclear Non-Proliferation Treaty" stipulated on 1 July 1968 are not considered.

Percentage of critical issuers

"Critical" issuers are those companies having a higher exposure to environmental, social and corporate governance risks, i.e. which have a lower ESG sustainability rating level (equal to "CCC" assigned by the specialized info-provider) in the equity and bond investment category and for which an escalation process has been activated, or is being assessed, which determines restrictions and/or exclusions with respect to the entirety of the individual assets under management ("ESG Binding screening").

Percentage of issuers selected on the basis of positive and negative criteria

The weight of government issuers that meet the specific positive and negative selection criteria identified by the Product, i.e. (i) issuers of green/sustainable bonds and (ii) companies publicly engaged in the energy transition process, particularly through the progressive reduction in Scope 1 and Scope 2 emissions to reach climate neutrality by 2050 ("Net Zero" goal).

Percentage of assets in government issuers meeting the screening criteria

The weight of government issuers that meet the selection criteria defined on the basis of the indicators of the "Sustainable Development Report" and Regulation (EU) 2019/2088 to monitor the principal adverse impacts relating to government issuers.

Percentage of assets in ESG or sustainable investment type UCIs

This is understood as assets of UCITS that promote environmental and/or social characteristics pursuant to Article 8 of Regulation 2019/2088 or which pursue sustainable investment objectives pursuant to Article 9 of said Regulation.

Carbon footprint

The value represents tonnes of carbon dioxide (direct - Scope 1 and indirect - Scope 2) of the investee companies in relation to their turnover.

Sustainable investment

Weighting (i) of issuers with net positive alignment with at least 1 of the United Nations' 17 Sustainable Development Goals (SDG) and no misalignment with any of the SDGs and (ii) of green, social and sustainability bonds.

Data as of 06/30/2024

Investment Manager Commentary

Market Development

The FTSE Global Core Infrastructure 50/50 Index performed negatively in June. Benchmark performance was driven by declines in the utility sector. Transportation and communications stocks were also lower for the month. Midstream energy was the lone area to experience modest gains for the period.

Performance and Investment Choices

The Portfolio underperformed the FTSE Global Core Infrastructure 50/50 Index for the month. In absolute terms, the Portfolio saw declines in several sectors including utilities, transportation and communications. However, the Portfolio saw gains in several midstream energy holdings for the month.

Outlook and Investment Strategy

Continued investor enthusiasm for the strong outlook for generative AI-related data center power demand growth propelled shares of our utilities sector and energy midstream holdings higher during 2Q24 due to rising expectations for forward power prices, regulated utilities electricity load growth, renewable energy development activity, and natural gas demand for gas-fired generation. Political risk re-emerged as a headwind as election results in Mexico and for European Parliament and upcoming elections in France and the UK this summer triggered investor concerns about how potential regulatory reform attempts could impact the profitability of transportation infrastructure and utilities in those countries. Overall, we remain positive about the long-term fundamental outlook for our holdings across all four infrastructure sectors of our investment universe. Additionally, we continue to believe that sustainability factors appear to be more influential in determining investment outcomes over time. We believe our regulated electric utility, independent power generator, and renewable energy developer holdings are well-positioned to capitalize upon a projected upward inflection in electricity demand growth driven by rapidly rising data center power needs, continued electric vehicle adoption, and further electrification of a broad array of industries. In our view, midstream companies with strong balance sheets, integrated asset systems with multiple touchpoints across the energy value chain, and strong sustainability metrics are well-quipped to continue to fare well even in a scenario where production growth slows. Transportation infrastructure stocks generally had a mixed 2Q24 performance reflecting more uncertain economic conditions in some geographies and increased political uncertainty in others such as France. We continue see a favorable outlook for a number of transportation sub sectors that we believe are well positioned with pricing power and end market growth across a range of economic scenarios. Lastly, regarding communications infrastructure, we favor data centers that are well-positioned to capitalize on two related themes: 1) robust growth from existing data demand drivers and growing contributions from generative AI and 2) rising pricing power related to tight supply and increased value of specialization, particular for the hyperscale market.

## IMPORTANT INFORMATION

Source of information and data related to the Unit of the Sub-Fund: Eurizon Capital SGR S.p.A, Società di gestione del risparmio, a public limited company (società per azioni) incorporated in Italy under number 15010 and having its registered office Via Melchiorre Gioia, 22 - 20124 Milan and authorized to act as investment manager under the supervision of CONSOB.

Morningstar Rating based on the Unit of this document. For more details about the methodology, please refer to the Glossary as well as the following link: [https://www.morningstar.com/content/dam/marketing/shared/research/methodology/771945\\_Morningstar\\_Rating\\_for\\_Funds\\_Methodology.pdf](https://www.morningstar.com/content/dam/marketing/shared/research/methodology/771945_Morningstar_Rating_for_Funds_Methodology.pdf). Morningstar rating is a quantitative assessment of past performance that takes into account risk and costs imputed. It does not take into account qualitative elements and is calculated on the basis of a (mathematical) formula. The classes are categorized and compared with similar UCITS classes, based on their score and they receive one to five stars. In each category, the top 10% receive 5 stars, the next 22.5% 4 stars, the next 35% 3 stars, the next 22.5% 2 stars, and the last 10% receive 1 star. The rating is calculated monthly on the basis of historical performance over 3, 5 and 10 years and does not take into account the future.
